POPULAR U.S. GOVERNMENT MONEY MARKET FUND, LLC

MONTHLY REPORT - 09/30/2026

FUND OVERVIEW

Investment Objective:

The fund seeks to provide current income consistent with liquidity and capital preservation by investing primarily in high-quality, short-term U.S. government securities.

Investment Strategy:

The fund invests in U.S. Treasury securities, U.S. government agency obligations, and repurchase agreements collateralized by U.S. government securities, in compliance with Rule 2a-7 under the Investment Company Act of 1940.

Important Risk Information & Disclosures

An investment in a money market fund is not insured or guaranteed by the FDIC or any other government agency. Although the fund seeks to preserve the value of your investment at $1.00 per share, it is possible to lose money by investing in the fund. Past performance is not a guarantee of future results. Current performance may be higher or lower than shown. Please review the prospectus for complete information.

The performance data shown represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For current performance to the most recent month-end, visit **www.popularfunds.com** or call **1-787-706-7000**. Performance figures may not reflect all charges that may be imposed in connection with the purchase or redemption of shares. The performance presented reflects the total performance return and reflects gains in share price and reinvestment of dividend and capital gain distributions. Performance would have been lower if fees had not been waived pursuant to applicable agreements or fee waivers. Fund returns that are over one year are annualized. Fund returns that are less than one year are cumulative. Please note under certain circumstances share price will fluctuate with market conditions, so investors may have a gain or loss when shares are sold. The performance of an index is not an exact representation of any particular investment. It is not possible to invest directly in the index. In contrast with the Funds, performance figures for the index do not reflect any expense, investment fees or advisory fees. However, the Funds' performance figures, and the returns of the entities, may have lower returns since they could reflect currently consistent investment objectives, risks, and expenses. All investments involve risk, including the possible loss of principal. This and other important information is contained in the Fund prospectus, which can be obtained from this website and should be read carefully before making any investment decision.
